DETAILED ACTION

1. The amendment filed on May 5, 2008 has been received.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

4. Claims 1-6, 12-21, and 23-27 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barger (US 6,155,650) in view of Baba et al. (US 4,593,953).

Barger disclosed, as shown in fig. 1-4, a protection device 10 for protecting a brake disk 24 in a disk brake from dirt particles, the brake disk having a pair of side surfaces and a radially outwardly facing edge surface disposed between the side

Art Unit: 3683

surfaces, said protection device comprising: at least one protection means 56 configured to cover at least partly the edge surface of the brake disk for effectively preventing dirt particles and on-coming, travel generated wind from directly striking the brake disk.

However Barger failed to disclose wherein the at least one protection means is at least partly constructed from material that is shape-influenced by heat.

Baba et al. teaches, as shown in fig. 1-2, the use of protection means 7, 8 that is shape-influenced by heat.

It would have been obvious to one of ordinary skill in the art to merely use the known shape-influenced by heat protections means into the device of Barger, as taught by Baba et al., in order to restrict the opening of the protection means and only open when the temperature is high and needed for cooling so as to minimize dirt particles from brake disk.

5. Claim 10 is rejected under 35 U.S.C. 103(a) as being unpatentable over Barger in view of Baba et al. as applied to claim 1 above, and further in view of Yanagi (JP 59-47531A).

Barger as modified failed to disclose wherein the protection means is L-shaped in section.

Yanagi teaches, as shown in fig. 7, a protection means 11, 11a is L-shaped in section.

It would have been obvious to one of ordinary skill in the art to merely utilize the known L-shaped protection means into the device of Barger as modified, as taught by Yanagi, as a matter of design choice in order to provide more rigidity to the protective means when closing.

6. Claims 11 and 22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

7. Applicant's arguments with respect to claims 1, 15, and 25 have been considered but are moot in view of the new ground(s) of rejection.

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
